Instructions to execute locally SQLite with the schema used in Coderunner:

1. Download the file sqlite-tools-win32-x86-3320200.zip (identified as sqlite3.zip in MOODLE)

2. Extract files to a local directory, for instance Desktop\BD_EXAM

3. Go to directory Desktop\BD_EXAM\sqlite-tools-win32-x86-3320200

4. Download the sql file that creates and populates the relations used in Coderunner, identified in MOODLE as dataset.sql

5. Move the file dataset.sql to directory Desktop\BD_EXAM\sqlite-tools-win32-x86-3320200/

6. Execute the program sqlite3.exe that is located in directory Desktop\BD_EXAM\sqlite-tools-win32-x86-3320200

7. In sqlite3 shell execute the command .read dataset.sql

You can now test your SQL queries before submitting them in Coderunner.
